

AI: machine learning, generative models, recommender systems

Risk to democratic resilience

Disinformation & synthetic media
information environments

Micro-targeted manipulation of voters
attitudes & behaviour

Referenda and direct-democracy tools destabilised
participation

Algorithmic repression & surveillance
power

Opaque, hard-to-contest automated decisions
governance

Opportunity for democratic resilience

Automated fact-checking & claim verification
information environments

AI-assisted media literacy at scale
attitudes & behaviour

AI-run deliberation protecting minority voices
participation

Early-warning monitoring, e.g. *Words of Warning*
power

Faster, more responsive public services
governance
